Slamming on the Breaks

After completing 20 of 40 legislative days, the Georgia General Assembly abruptly adjourned on Thursday for a two week break in an effort to address the brutal budget shortfall. During the break, the Senate and House Appropriations committees will meet jointly to address the deteriorating revenue situation and the FY 2011 budget.

House leadership has encouraged lawmakers to use this time to focus on the budget and a few other key policy areas, but committee work in the Senate is expected to continue.

Property Tax Appeals and Assessments

House Resolution 1, Representative Lindsey's proposed constitutional amendment to cap increases in the assessed value of all property types, and the companion bill HB 517 have received several hearings in the Ad valorem Subcommittee of the House Ways and Means Committee.

Senator Chip Rogers' bill related to Property Tax Appeals and Assessments, [SB 346](#), received a second hearing in the Senate Finance committee this week and is expected to be considered for a committee vote soon.

The 47 page bill details over 40 different changes to current law, including:

- Establish sales price of an "arms-length" transaction as the maximum assessed value for a period of 1-year following the transaction. This shall include all sales made on or after January 1, 2010
- Revenue generation shall be considered when determining assessed value of commercially zoned property
- Any county whose digest includes a large assessed commercial value shall make available to the taxpayer a licensed appraiser who will act in place of the BOE to determine value of any parcel which is zoned commercial

Water Stewardship Act

SB 370, the Senate version of the Water Stewardship Act passed out of the Senate Natural Resources and Environment Committee on Thursday. The House Natural Resources and Environment Committee held a hearing on the House version (HB 1094) on Thursday morning.

The Water Stewardship Act will require low flow toilets, faucets and other equipment to be installed in new construction after July, 2012. The bill also called for the installation and use of sub-metering in new multitenant commercial and residential buildings.

BOMA worked with the Governor’s Office and Legislative leaders to develop and advocate an amendment to the bill to clarify that the mandates do not apply to office environments. BOMA’s efforts were successful and the submetering mandate now excludes multiunit office buildings and the office component of mixed use developments.

Civil Court Filing Fees

Efforts are underway to increase fees for civil court filings to help fund the courts. SB 429 will raise fees for civil filings by \$100. The bill states: *In addition to all other legal costs, there shall be charged to the filing party and collected by the clerk an additional filing fee of \$100.00, to be known as a judicial operations fund fee, in each civil action or case filed in the superior and state courts.... such fee shall apply to all adoptions, certiorari, trade name registrations, applications for change of name, and all other proceedings of a civil nature.*

Legislative Tracking

Note: Yellow indicates new legislation. Green indicates movement this week.

Type	Number	Title	Sponsor	Details	Status	Committee
